 - 1 x Rear Bag Stand
 - Tool Kit & Instructions.

Lithium battery- Fitted as standard weighing only 10kg with a 2 year guarantee

Powerhouse Buggy 2 Go Lithium Golf Buggy

The Golf "Buggy 2 Go" is a brilliant golf buggy freshly designed for the new golf season and beyond. The buggy is based on a steel tube frame that has the advantage of being able to increase or decrease in length to fit the user. It also incorporates all round suspension providing the user with a smooth glide-like ride over the golf course.

The seat is covered in one piece waterproof vinyl and includes quick lift arm rest for extra stability. It is fully adjustable in all directions: Up and down, forward and backwards, and rotary. The electrical system is 24v powering a S-Drive 140A controller giving 39% more power than standard 24v buggies, motor gearbox transaxle with integral EMB (Electric magnetic brake), so no manual brake is needed. The S-drive controller produces a max speed of 15 km/h (10mph)

The buggy slows naturally when you decelerate and the brake is automatically applied. The buggy includes a high quality single 24v Lithium battery, capable of propelling the buggy around 27+ holes of golf without any issue.

The instruments are simple and clear. The buggy has a 3" dash board displaying Speed, travel, temperature, battery voltage and %. Reverse is controlled by a simple rocker switch on the dashboard, alongside a variable rotary switch that allows adjustment of the max top speed.

The buggy is fitted with an array of front and rear high powered and low energy LED lights with left and right indicators (Rear) and a horn. There are also two snugly hidden stabilizer wheels on the rear to prevent the buggy from rearing up when traversing a hilly fairway or difficult terrain. The complete frame of the buggy is covered in a two piece lightweight fibreglass body giving the buggy its fantastic look.

The metallic paintwork is faultless, keeping the buggy and user free from splashes and mud. Tyres are; standard course friendly 13 x 5 spec with spoked wheel trims, which completely compliments the look of this buggy.

Everything you need is included in the box. Just add driver and clubs to complete this amazing "Buggy 2 Go" package.

Front 730mm wide. Back 800mm Wide. Length 1500mm
Height when steering folder down 500mm

Features
