1 x 24v Charger.  
1 x 22ah Lithium Battery  
2 x Stabilizer Wheels  
1 x Front Mesh basket.  
1 x Golf Club Carrier  
Tool Kit and Instructions.

The **Powerhouse Golf Pro-S** Golf Buggy is a further development to the original Pro Golf Buggy.

The Pro-S offers the same ease in transportation with a chassis that can be quickly dismantled to fit in most hatch backs and small storage spaces.

The 'twisting' chassis of the buggy is durable and strong yet is flexible enough to ensure that all four wheels of the buggy remain firmly on the ground even over troublesome terrain.

This allows the buggy to offer supreme grip through the large rubber fairway friendly tyres in all weather conditions.

The main difference between the Pro and the Pro-S is the control of the buggy. The Pro-S operates through a more conventional steering wheel that incorporates an easy to read 3 light battery display.

The forward and reverse drive is managed through the key switch whilst acceleration is controlled through a single foot pedal meaning the Pro-S is an even easier and comfier ride.

All of this is now powered by a single lightweight Lithium battery as standard to make navigating around a light to medium golf course effortless.
