

PRE-OWNED PRO-LITE

PRE-OWNED PRO-LITE

Sometimes all we need is a little extra help. The Powerhouse Pro-Lite Golf Buggy is designed to offer just that.

The Pro-Lite is the smallest buggy in the Pro range. The emphasis of the design was to make a buggy that was capable of carrying an adult up to 10 stone over a 9-18 hole golf course, complete with clubs, combined with maximum ease when loading and unloading.

4 wheels are used throughout the Pro range, and the Pro-Lite is no exception. The transmission is controlled via a single centre mounted motor/gearbox assembly, driving through the rear wheel. All sealed with no maintenance every being required.

Forward and reverse motion is achieved using the very easy to operate actuator control mounted on the steering wheel. This also incorporates the 3 stage battery indicator, keeping you fully informed of the battery condition.

Golf clubs are mounted on the rear of the buggy, using the simple 'hook on' method speeding up assembly time.

This buggy does not include a battery. We do however have a wide range of Lead Acid suitable for this buggy. For more information please visit www.powerhousegolf.co.uk

All our pre-owned buggies are tested thoroughly in our workshop and graded through 1 - 10 for condition. Grade 10 is excellent condition with the usual signs of use, grade 1 is mechanically sound but obviously well used and of a certain age.

All our pre-owned buggies are priced without batteries but many options of battery are available and a full warranty is given with new batteries purchased. The buggy comes with a three months all parts and labour warranty unless stated on specific buggies.

This buggy is graded at 8
