

## PRO-LITE

A Lite weight alternative to the main stream models

If you are able to lift your Golf Bag, then you will have no problem lifting the heaviest part of the Pro Lite

POWERED BY POWERHOUSE  
**LITHIUM**  
B A T T E R Y

Very compact components, allows this buggy to be transported and stored in the very smallest of cars.

Picture showing Pro Lite fitted with 2 x 16Ah Lithium Batteries.

Note: this buggy has a recommended user weight limit of 10 stone

Sometimes all we need is a little extra help. The Powerhouse Pro Lite Golf Buggy is designed to offer just that.

The Pro Lite is the smallest buggy in the Pro range. The emphasis of the design was to make a buggy that was capable of carrying an \*adult Up to 10 Stone over a 9-18 hole golf course, complete with clubs, combined with maximum ease when loading or unloading.

4 wheels are used throughout the Pro range, and the pro Lite is no exception.

The transmission is controlled via a single centrally mounted motor/gearbox assembly, driving through the rear wheel.

All sealed with, with no maintenance ever being required.

The Buggy is now fitted as standard with 2 x 16Ah Lithium batteries, weighing on 2.2kg each

Forward and reverse motion is achieved using the very easy to operate Actuator control, mounted on the steering wheel.

This also incorporates the 3 stage battery indicator, keeping you fully informed of battery condition.

Golf clubs are mounted on the rear of the buggy, using the simple "hook on" method speeding up assembly time.

All UK parts, design and construction is sure to enhance your experience with this very capable entry level buggy.

Maximum recommended weight limit of user. Range with batteries supplied is 9-18 holes, upgrades are available to increase range.
