  - Tool Kit and Instructions.

Closeup of Uno Cockpit area.

Having a single seater golf buggy should not mean compromise or giving up on all the comfort and luxury offered by the double seater models.

The **Powerhouse** Uno is very much based on the design and build of it's sister buggy, the Duo.

Under the covers of the Uno, the comparison is very easy to spot. Powered by 2 x 80ah TROJAN batteries (so that power sorted out) Rack and pinion steering, Full digital speed controller unit drum brakes and foot operated controls.

Once on board you will soon appreciate how the Uno Buggy feels and drives just like the larger models.

Foot operated controls and the positive steering makes your experience a pleasurable one. This buggy is designed for the single user in mind, but without giving anything up on standards or expectations.

The Uno buggy is supplied in Ivory White. To compliment the Uno, an array of accessories are available as follows:  
Side weather protectors. Alloy wheels. Wooden dashboard. Cup holders. Windscreen and trailer.

Its all here. So Indulge yourself, with a buggy that packs all the home comforts you would normally expect from one normally reserved for the hire market.
